

## 32% of Data Losses For You & Your Support Engineer Miss Operation

www.vsrcbd.com

**“Only Professional Data Recovery Service Provider In Bangladesh”**

Individuals make the mistake to label the “expert” to any person who knows computer more than the individual to perform data recovery. Not only that lead additional data loss but also unqualified could make your data unrecoverable forever.

Never Run CHKDSK or SCANDISK if your HDD does not run due to bad sectors. You will face more data loss. (Read **Computer Jagat-October, 2007** for more details)

What to do when data lost?

- \* Do not panic
- \* Do not install any software
- \* Turn off the PC immediately
- \* If any unusual sound occurs unplug the pc directly from electricity & never reconnect the HDD.
- \* for more information... [www.vsrcbd.com](http://www.vsrcbd.com)

### Terms

You have to submit your HDD to assess and you will get an assessment report within 48 hours after we receive your media. The report will show you the pricing information, possibility of recovering data, time to recover data etc. Our tech will contact you regarding your contact information. You can also track you HDD information anytime, anywhere you want, to the following URL: <http://shahi.vsrcbd.com>

We ensure you write protection toward your HDD. Incase, we are unable to recover your data due to lack of technological tool then we can redirect you outside of our country to recover your data.

**International pricing standard is started from \$495 to \$5000 or more. Never the pricing could be flat. Our pricing range is 14,000 taka to 98,000 taka only based on different damage level of the HDD. No data, No fees. Submitted price is not negotiable.**

You have to pay at least 50% in advance during order submission; otherwise we will not start the job. You must take your recovered data within 3 days after recovery completed. Otherwise you will be charged 100 taka per day as late fee. We keep your recovered data as backup at extra HDD until delivery of your data, that's why we charge it. Your data is backed up to us for 3 days after delivery, incase you need data again from us you can collect those for 100% free of cost. We delete your data permanently after 3 days of delivery without confirming you.

After recovering from the damaged one, your data will be transferred into a new HDD. The new HDD price will be added or you can submit a HDD to store your data.

Never reconnect the HDD to the pc if any unusual sound occurs which can make scratch on the platter and data will be unrecoverable.

**Never try to make the job you & even by your support engineer which might lead more data loss. The job is not of you or even your support engineer, the job is of HDD & Data Recovery Specialist.**
